SIERRA VALLEY, April 25. Ed. Journal -It might be of some interest to your readers to know the resources of Sierra Valley, situated in Plumas and Sierra counties at the altitude of 4500 feet. It is of crescent shape, about 25 miles in length, and has an average width of ten miles. About 30,000 acres of the Valley is

MEADOW LAND Yielding over 30,000 tons of hay yearly. This is fed chiefly to dairy cows. A few stock and beef cattle are fed here, but dairying is the principal business over

Are kept in the Valley consisting of 2500 cows. The yield per annum is expect to arrange affairs and resume about 125 hs. of butter per head aggregating 312,500 lbs. or 156 tons sold at 20 cents per b. brings \$62,500 into our Valley every year. 125 bs. of butter per head is a small yield: many dairies average far more. A. B. Huntley made 246 lbs. per head, his next neighbor S. Lathrop almost as much 235 hs; B. F. Bobo 198 ibs. and others ranging along down to 100 hs. per head.

OUR MARKET

Is Virginia City, Reno, with other towns on the railroad and the mining towns in Plumas and Sierra counties. Besides the dairy we have a grain product which is no small item. In 1876 it amounted to 80,060 bushels, in '77 about 65,000 bushels and last year not over 30,000 bushels. Owing to the

this year there will be very little put in for it is the general opinion that the "hoppers" will take everything green in the Valley. We have eggs enough to stock 20 valleys as large as Sierra. So you may look out for them on Truckee Meadows the coming Summer. They are but a short distance from there, only 15 miles, at the head of Long Valley, on their way to your Valley.

DAIBTMAN.

Hammond & Wilson are doing the right thing: The upper portion of their new building will be made into a dance hall and theater. TIRED OF CANADIAN RULE.-The following important news is telegraphed from Victoria, British Columbia, under

coming more unsettled as the 1st of draws near. The situation is alarming, as it threatens the permanency of Canadian connection on the Pacific, if it does not imperil British connection. This afternoon, on motion of a member who be conjectured, but the best friends of Canada in the province are despondent and discuss secession as the probable outcome of the existing state of affairs. The discussion, which was long and exciting, was concluded with closed doors. It has transpired that a stringent resolution was passed and directed to be cabled to London to-night. It demands that, failing in the fulfillment of treaty obligations, the province shall be allowed to secode May 1. The action of the House seems to meet with popular indorsement.

THE UNDERGROUND TELEGRAPHS IN GERTANY.

Berlin correspondence to the London Timer.

The Reichstag has voted the sum of 1,830,000 marks for the further construction of subterranean telegraph wires. Germany will soon be intersected with a complete network of this invisible and inaccessible means of communication which no thunder storm can destroy and no roving enemy can readily cut. In 1875 it was first proposed to connect by underground cables all the chief centres of commerce and industry in the Empire, all the fortresses and places of arms, the cost being reckoned 34,000,000 marks (£1,700,000). The first experiment of the kind was made by the sinking of a wire between Berlin and Halle, which had been subjected to the strictest scientific tests, and yielded highly satisfactory results, not a single interruption being recorded. When the whole work is ended the German Empire will be crossed by two great main cables, stretching from Konings berg in the north to Strasburg in the south and from Hamburg in the northwest to Ratisbon in the southeast inter secting at Berlin. Strasburg will also be connected with Metz. In addition, another sunker wire will curve away up from Strasburg through Cologne to Hamburg while Ratisbon and Koningsberg will similarly be connected. An underground wire will also bind together Berlin Dresden, Stutigart and Munich, communicating with a fifth main cable passing through South Germany. In three years, it is said, the whole network thus planned by Dr. Stephen, the Postmaster General, will be completed. The half is already finished. An under-ground cable now connects Berlin, Halle, Leipsic, Cassel, Frankfort, May-ence, Mannheim, Carlsruhe, Rastadt and Strasburg; another line runs from Barlin though Mandalung Burnish Berlin through Magdeburg, Brunswick, Hanover, Minster, Dusseldorf and Barmen-Elberfeld to Bologne, while Betlin and Hamburg are also connected, sum of 18,000,000 marks (£900,000) has already been spent on this subter ranean enterprise, and the money now voted will be employed in connecting the towns and harbors along the Baltic shore for the furtherance of commerce and coast defence—a work, said the Postmaster General, which should be proceeded with as speedily a possible.

Tuz greatest activity prevails in carrying out the preliminary measures for the construction of the submarine tunnel between Calais and Dover. No than 7,971 soundings have been taken, which have brought up 3,207 specimens of different geological formations. The tunnel, which is to be 22% miles long, will be dug through a stratum of gray
